EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ernest D. Buff on 12 September 2008.

The application has been amended as follows:

Replace claim 1 with the following:

--1. A surgical sponge comprising:

- a) three substantially spherical radiopaque markers;
- b) all three of said markers being closely grouped, proximate and directly contiguous to one another;
- c) each of said markers having an x-ray density equivalent to at least about 0.1 g/cm^2 of BaSO_4 ; and
- d) said radiopaque markers being disposed in a relationship that is substantially fixed both in spacing and in orientation, whereby said markers produce an x-ray image having a distinctive, visually recognizable shape.--

Replace claim 13 with the following:

--13. A method of detecting a surgical sponge within a surgical patient, said surgical sponge comprising three substantially spherical radiopaque markers, all three of said markers being closely grouped, proximate and directly contiguous to one another, each of said markers

having an x-ray density equivalent to at least about 0.1 g/cm^2 of BaSO_4 , said radiopaque markers being disposed in a relationship that is substantially fixed both in spacing and in orientation, whereby said markers produce an x-ray image having a distinctive, visually recognizable shape, and said method comprising the steps of:

(a) obtaining at least one x-ray of at least a portion of said patient likely to contain said radiopaque markers; and

(b) examining said x-ray to detect and locate an image of said sponge.--

Replace claim 14 with the following:

--14. A method of detecting a surgical sponge within a surgical patient and treating said surgical patient, said surgical sponge comprising three substantially spherical radiopaque markers, all three of said markers being closely grouped, proximate and directly contiguous to one another, each of said markers having an x-ray density equivalent to at least about 0.1 g/cm^2 of BaSO_4 , said radiopaque markers being disposed in a relationship that is substantially fixed both in spacing and in orientation, whereby said markers produce an x-ray image having a distinctive, visually recognizable shape, and said method comprising the steps of:

(a) obtaining at least one x-ray of at least a portion of said patient likely to contain said radiopaque markers;

(b) examining said x-ray to detect and locate an image of said sponge; and

(c) carrying out a surgical procedure to remove said sponge
from said patient.--

Cancel claims 17-19.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Support for the preceding amendments is found at page 15, line 21-page 16 line 2 and figure 10. Regarding claim interpretation, "directly contiguous" is herein construed to mean directly touching or contacting, consistent with figure 10. In other words, the first sphere touches both the second and third spheres and the second sphere touches both the first and third spheres.

The most relevant art of record, Sirimanne *et al.* (US 6,371,904 B1) teaches a sponge-like material with three differently shaped radiopaque markers that are not in direct contact with each other, one of which is a sphere (150)(see fig. 1D). This reference does not disclose or fairly suggest a surgical sponge with three radiopaque markers including spheres where all three spheres are in direct contact with each other.

Applicant's remarks dated 03 April 2008 in view of the instant amendments persuasively distinguishes the instant invention over Ballerd (US 6,777,623).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
